Phone: 610-286-0018 • Fax: 610-286-0021

Email: info@mypetsbrace.com

Thank you for contacting My Pet's Brace. We look forward to helping your dog/patient walk and play comfortably again with the help of a custom brace. An effective custom brace starts with the creation of a well-formed cast taken by a veterinarian or rehabilitation professional.

If the veterinarian or rehabilitation facility does not have the materials to make the fiberglass cast, a casting kit may be ordered from the My Pet's Brace website or by calling 610-286-0018.

Please follow the process below:

Step 1: Veterinarian or rehabilitation professional reads the casting instructions below and watches the *Hock Brace Casting Tutorial* video at mypetsbrace.com/casting-videos.

Step 2: Veterinarian or rehabilitation professional takes a cast of the dog's leg.

Step 3: Veterinarian or rehabilitation professional completes the *Hock Brace Order Form*.

Step 4: Mail the cast and *Hock Brace Order Form* to My Pet's Brace in Morgantown, PA (address above).

Step 5: Once the cast is received, My Pet's Brace calls the purchaser of the brace to take payment and provide the specific date the brace will be completed and shipped from our facility.

Step 6: Veterinarian or rehabilitation professional fits the brace on the dog. Read the Fit and Care Instructions included with the brace.

Braces are fabricated in 5 business days and include a no-hassle 120 day warranty. Because our devices are custom-made and will not fit any other pet, no refunds can be offered by My Pet's Brace. Visit our website for more information.

HOCK BRACE CASTING INSTRUCTIONS

Watch *Hock Brace Casting Tutorial* video at www.mypetsbrace.com/casting-videos.

The casting procedure for a custom brace is a different process than casting for a broken bone, disease or injury.

Have a helper sit on the opposite side of the dog's injured leg. The helper will hold the stockinet and rubber tubing cutting strip with one hand and support the dog from sitting with the other hand underneath the dog's belly. Position the dog in a normal/corrected standing position, with the dog's paw flat on the ground (90° angle). If there is a contracture, cast the leg in the most functional position. There is no need to sedate the dog (unless there are extreme circumstance).

Have a bowl of lukewarm water, a sharp utility knife, a pair of bandage scissors and a marker readily available.

Hold the casting tape underwater for 10 seconds, then squeeze water out three times.

Start the cast by quickly wrapping the tape distally, then cover the entire paw and move up to just below the tibial tubercle. Overlap each layer no more than 2-3 times, cutting off any excess tape not needed.

Mold the tape to conform to bony prominences. Massage the layers together.

Use the permanent marker to trace the rubber tubing. Draw several hash marks perpendicular to the rubber tubing line.

Use the utility knife to cut the cast off before the casting tape completely hardens (less than 4 minutes). Do not wait too long. Cast will still be a little soft.

Remove the rubber tubing cutting strip. Cut the stockinet off with the bandage scissors and remove the cast from the dog's leg.

Tape or rubber band the cast together without deforming the cast. Write the dog's name on the cast.

Complete the *Hock Brace Order Form* and record all measurements in centimeters using a soft tape measure. Length Measurement 1 – stifle joint to hock joint

Length Measurement 2 – hock joint to floor

Length Measurement 3 – length of paw, include nails

Circumference Measurement 1 – at middle calf

Circumference Measurement 2 – at hock joint

Circumference Measurement 3 – below hock joint

On the back of the *Hock Brace Order Form*, take a tracing of the dog's paw while the dog is standing.

Email a side view picture of the dog while he/she is standing. Take the picture at dog's eye level. Do not take the picture while the cast is on the dog's leg.

Email to: info@mypetsbrace.com

Mail cast and *Hock Brace Order Form* to:

My Pet's Brace
3508 East Main Street
Morgantown, PA 19543
